

What is Cyber Essentials+?

Cyber Essentials+ is a UK government scheme supported by the NCSC (National Cyber Security Centre) that sets out fundamental security controls to protect organisations against around 80% of common cyber-attacks.

Cyber Essentials+ focuses on five important technical controls which are designed to guard against the most common internet-based cyber security threats.

The five key elements of the Cyber Essentials+ programme are:

- Firewalls
- Secure Configuration
- User Access Control
- Malware Protection
- Security Update Management

By achieving certification to the scheme, The Oxford Group demonstrates our commitment to cyber security.

Proving Our Commitment To You

By displaying the Cyber Essentials+ badge it means we have put measures in place to protect not only our own organisation, but also the security of our clients, by meeting a UK Government-endorsed standard.
